

# Christ the King

## R.C. Primary School

# Bi-Store™

## Requirement Identified

An increasing number of pupils at Christ the King Primary School in Blackpool were cycling to school, but the lack of a dedicated cycle parking area meant that bikes were being left along the fence outside the school.

It was decided that a shelter should be installed so that cycle parking could be more easily controlled and security improved.

## Solution

Sarah Smith, the Headteacher, contacted Glasdon to discuss the options available. A site survey was undertaken by Glasdon and a location was identified that would be suitable for two Bi-Store shelters.

Using Glasdon's groundworks service meant that the required concrete base could be prepared at a convenient time for the school prior to installation of the shelters.

## Resulting Benefits

The Bi-Store shelters have proved to be the ideal solution for the school and offer many added benefits:

- **Steel framework with corrosion-resistant Armortec® coating for a long life span with minimal maintenance.**
- **Delivered to site in fully assembled form to minimise disruption during installation.**
- **Additional Bi-Store Shelters can be easily interlocked side by side with existing shelters to provide extra parking spaces at a later date.**
- **Kit form delivery is available for sites with restricted access.**
- **Shelters are offered with a choice of stands, cladding and colours to suit individual requirements.**
- **Bi-Store can be easily relocated to suit changing circumstances on site.**

## What the customer says...

“Glasdon handled the whole project very efficiently from start to finish.

*The new shelters have helped to encourage more pupils to cycle to school and we would be happy to use Glasdon again if we need to provide more cycle shelters in the future.*”

**Sarah Smith, Headteacher,  
Christ the King R.C. Primary School.**
