

Quality Seating for South Lanarkshire Council

Problem Identified

South Lanarkshire Council's Community Plan and Regeneration project included the improvement of the District Parks within the area. One part of this project was to provide comfortable seating within the District Parks. The seating needed to complement the historic location, and to be of high quality, requiring minimum maintenance.

Solution

South Lanarkshire Council had previously purchased Brunel™ litter bins from Glasdon UK and were looking for a seat which would match all their requirements, and would also co-ordinate with the Brunel litter bins, already in place.

A specially trained Glasdon Representative demonstrated the Stanford™ seat with Enviropol® slats to South Lanarkshire Council.

Stanford seat is traditionally styled with 100% recycled cast aluminium seat-ends and Enviropol slats which are also manufactured from recycled material. Stanford seat co-ordinates perfectly with Brunel litter bin to help enhance the environment of the District Parks throughout South Lanarkshire, therefore helping to achieve the objectives of the Community Plan and Regeneration project.

Resulting Benefits

Since siting Stanford seats in the District Parks, South Lanarkshire Council have noticed benefits including:

Reduced Maintenance

The 100% recycled aluminium seat-ends require minimum maintenance and are weather resistant.

The Enviropol slats will not chip or rust, are easy to clean and never need painting.

Co-ordination

Stanford seat co-ordinates with the traditionally styled Brunel litter bins which were already sited throughout the District Parks.

Stylish Design

The Victoriana styling of the seat complements the historic locations throughout the District Parks.

What the Customer Says

“South Lanarkshire Council are very happy with Stanford Seat as it suits our needs in these high profile locations and enhances our overall parks and open spaces provision.”

Kenny Lean, Contracts Administrator, South Lanarkshire Council

We are grateful to South Lanarkshire Council for the kind help given in the production of this case study.
