9.30AM - 4PM

www.glasdon.com

C-Thru 50G is a large capacity container with a clear polycarbonate body that allows the contents to be seen. This increased visibility helps minimize the risk of cross-contamination of waste and helps to reduce costs.

Manufactured from robust Durapol™ material, C-Thru 50G is an extremely strong recycling container ideal for indoor and outdoor use. The innovative flat pack design makes it easy to store, transport and assemble. The container is available with three different aperture options, which can be supplied with or without a key lock. Venting holes reduce tension caused by the bag, which eases the bag removal process for the operator.

DHS compliant

Dedicated apertures

Reduces the risk of cross-contamination

Flat pack design

Aids storage and transportation

Body interlocking system

Allows the container to be easily assembled and dismantled

Transparent polycarbonate body

Provides visibility of contents for easy identification of the waste stream

Color coordinated base and aperture molding

Used as a visual cue to encourage recycling

Secure-fitting plinth with venting holes

Eases the bag removal process

Optional Extras

- 4-point key lock
- Personalization

Siting Options

- Raised base feet
- Ground fixing pegs

Personalization

At Glasdon we understand the importance of aesthetics which is why we offer the opportunity to incorporate your company logo, brand and colors onto your chosen products. We can provide you with a free of charge illustration so you can see exactly how your product will look before you place your order.

Please call to discuss your requirements today at 1-855-USGLASDON.

Material

Glasdon products are manufactured from high performance materials and undergo stringent quality checks to ensure durability and best value, underlining our commitment to provide quality products. C-Thru 50G is manufactured from robust Durapol material that is formulated to endure extreme conditions and is impact-tested in our Quality Assurance Laboratory. The strength of the C-Thru 50G has also been tested by a skilled ice hockey team. Due to its exceptional strength and robustness, the container was able to withstand the impact of the fast-flying pucks.
